SUMMARY

Versatile, adaptable web developer with eight years of experience looking to apply my development expertise to front end and user experience designs and seeking to apply this knowledge while transitioning to design roles. Proficient in HTML/CSS3, Adobe Photoshop, WordPress page builders (Gutenberg, Beaver Builder, etc), content management systems conventions, converting mockups and wireframes to functional code with some familiarity with GIMP, Sketch, Webflow, and other Adobe products. Adept at written and verbal cross-functional communication, adaptability and learning new skills quickly, prioritization, problem-solving, attention to detail, and diligence to maintain security and quality standards. Driven by beautiful user experiences, an eye for design, results, precision and strong empathy for the end user.

SOFT AND TECHNICAL SKILLS

Design and UI/UX Tooling

- **Design Software:** Figma (including Dev Mode), Adobe Photoshop, Framer Motion (UI Animation)
- **Visual Optimization:** Google Squoosh (Asset Compression), Browser DevTools (Real-time Typography and CSS styling)
- **Methodologies:** Agile Project Management, Responsive and Adaptive Design, UI/UX Development, Mobile-First Design

Frontend Development

- **Core Technologies:** HTML5, CSS3, Sass/SCSS, JavaScript
- **Frameworks & Libraries:** jQuery, Tailwind CSS, Bootstrap, React.js, Next.js, Component-driven development
- **CMS & SEO:** WordPress (Custom Themes & 3rd Party Page Builders), Image Optimization, SEO Best Practices

Professional & Soft Skills

- **Design-to-Code:** Proficient at converting Figma wireframes and prototypes into high-fidelity web interfaces
- **Problem Solving:** Critical thinking and technical troubleshooting for complex layouts and forward-thinking designs
- **Collaboration:** Strong verbal and written communication skills; experienced in cross-functional team environments

PROFESSIONAL EXPERIENCE

Full Stack Web Developer, 10/2025 – 02/2026

Promotional Management Center (PMC) – Stacy, MN

- Developed full-stack MVC applications from major brands using Symfony, CakePHP, and Twig
- Translated accessible frontends from complex Figma specifications using Sass, Stimulus and modern JavaScript
- Delivered rapid-turnaround web solutions for high-stakes fulfillment services, data management, and configuration
- Implemented accessibility annotations from Figma to WCAG-compliant application interfaces

Software Engineer (Full Stack, PHP), 09/2021 – 09/2024

LuminFire – Minneapolis, MN

- Constructed new WordPress digital products from the ground up and expanded the capabilities of existing sites through custom feature development.
- Worked directly with clients regarding styling and layout changes and providing design recommendations
- Implemented regular maintenance and hotfix patches with analytical thinking for security efficiently reducing maintenance hours by 20%.
- DevOps, CI/CD automation including deployment through Git in production systems, ensuring 100% bug free code.
- Developed and integrated new features into multiple Laravel applications to enhance functionality and user experience.

Web Developer (Contract), 03/2021 – 09/2021

Experis at Winnebago – Minneapolis, MN

- Delivered updates and enhancements of Winnebago's core and subsidiary websites directly increased customer engagement.
- Utilized DynamicWeb .NET, SQL databases and JavaScript to create new website features.
- Making improvements based on constructive feedback through code reviews, ensuring 100% bug free production code.
- Expanded API functionality through the development of new sections using Next.js and React.js.

Full Stack Software Engineer, 07/2019 – 02/2021

Codelation – Fargo, ND

- Developed and deployed scalable web applications for startups.
- Collaborated with Agile/Scrum teams to deliver high-quality products.
- Experienced with Ruby on Rails, React.js, Heroku deployment, API Integration and related technologies.
- Implemented unit testing into existing projects with RSpec and Capybara, ensuring 100% bug free production code.

Software Engineer I, 05/2018 – 07/2019

New Vision Solutions – Moorhead, MN

- Developed and maintained Internet of Things (IoT) projects using Thingworx and Augmented Reality applications.
- Contributed to the development of Java software for product configuration management, collaborating effectively within an Agile development team.
- Utilized JavaScript, CSS, Java, and JSON in a Windows/VSTS development environment.
- Created documentation diagrams for architecture, data flow, and program flow.

Web Developer, 10/2016 – 04/2018

Insight Technologies – Fargo, ND

- Contributed to development on a large-scale Laravel e-commerce application.
- Developed SSL certificate monitoring and reporting application in Laravel which reduced expired certificates by 50%.
- Successfully delivered feature updates, content management, and maintenance solutions across various platforms

Web Developer (Contract), 04/2016 – 10/2016

Preference Personnel at Dakota Supply Group – Fargo, ND

- Contracted and led the consolidation of two intranets into a unified Wordpress platform for the intranet
- Implemented custom PHP, designed information architecture, and integrated SFTP feeds to enhance functionality
- The consolidation of the two intranet sites which increased interdepartmental relations and iefficiency

EDUCATION

Minnesota State Community and Technical College | Moorhead, MN

Associate of Applied Science in Web Development | 2015

Extended Technical Focus in Computer Programming: Python, Microcomputer Databases, Database Design, and Linux
