Language & Frameworks: PHP (Laravel), Ruby on Rails, JavaScript (ES6), React.js, C# (Umbraco CMS), Custom WordPress (Gutenberg/Beaver Builder/Gravity Forms), MySQL, MVC

Frontend & Design: HTML5, CSS3, Sass/SCSS, Tailwind CSS, Bootstrap, Responsive Design, UI/UX Development, Figma, Adobe Photoshop -

Architecture and APIs: RESTful API Integration, Stripe API, Postman, Web Analytics (Google Analytics) Integration

Tooling & Operations

DevOps & Systems: Docker (Containerization), Vagrant, Linux/UNIX CLI, CI/CD Workflows, Git (GitHub/GitLab), and Site & Database Migrations.

Cloud & Environments: DNS Configuration, SSL Certificates (Let's Encrypt/Cloudflare), VirtualBox, Laravel Forge, Exposure to AWS

Specialized Skills: Technical Troubleshooting, Debugging, SEO Optimization, Performance Optimization, Security Audits

PROFESSIONAL EXPERIENCE

Full Stack Web Developer, 10/2025 – 02/2026

Promotional Management Center (PMC) – Stacy, MN

- Developed full-stack MVC applications from major brands using Symfony, CakePHP, and Twig
- Translated accessible frontends from complex Figma specifications using Sass, Stimulus and modern JavaScript
- Delivered rapid-turnaround web solutions for high-stakes fulfillment services, data management, and configuration
- Implemented accessibility annotations from Figma to WCAG-compliant application interfaces

Software Engineer, 09/2021 – 09/2024

LuminFire – Minneapolis, MN

- Constructed new WordPress digital products from the ground up and expanded the capabilities of existing sites through custom feature development.
- Executed regular maintenance and hotfix patches with analytical thinking for security efficiently reducing maintenance hours by 20%.
- Worked with CI/CD and automation including deployment through Git in production systems, ensuring 100% bug free code.
- Developed and integrated new features into multiple Laravel applications to enhance functionality and user experience.

Web Developer (Contract), 03/2021 – 09/2021

Experis at Winnebago – Minneapolis, MN

- Utilized DynamicWeb .NET, Typescript and JavaScript to create new website features.
- Directly contributed to the development and enhancement of Winnebago's core and subsidiary websites which directly increased customer engagement.
- Making improvements based on constructive feedback through code reviews, ensuring 100% bug free production code.
- Expanded API functionality through the development of new sections using Next.js and React.js.

Software Engineer, 07/2019 – 02/2021

Codelation – Fargo, ND

- Developed and deployed scalable web applications for startups.
- Collaborated with Agile/Scrum teams to deliver high-quality products.
- Experienced with Ruby on Rails, React.js, Heroku deployment, API Integration and related technologies.
- Implemented unit testing into existing projects with RSpec and Capybara, ensuring 100% bug free production code.

Software Engineer I, 05/2018 – 07/2019

New Vision Solutions – Fargo, ND

- Developed and maintained Internet of Things (IoT) projects using Thingworx and Augmented Reality applications.
- Contributed to the development of Java software for product configuration management, collaborating effectively within an Agile/Scrum team.
- Utilized JavaScript, CSS, Java, and JSON in a Windows/VSTS development environment.
- Created documentation diagrams for architecture, data flow, and program flow.

Web Developer (Full Stack), 10/2016 – 04/2018

Insight Technologies – Fargo, ND

- Contributed to development on a large-scale Laravel e-commerce application.
- Developed SSL certificate monitoring and reporting application in Laravel which reduced expired certificates by 50%.
- Successfully delivered feature updates, content management, and maintenance solutions across Umbraco CMS, Vue.js, and JavaScript projects

Web Developer (Frontend), 04/2016 – 10/2016

Preference Personnel at Dakota Supply Group – Fargo, ND

- Contracted and led the consolidation of two intranets into a unified Wordpress platform for the intranet.
- Implemented custom PHP, designed information architecture, and integrated SFTP feeds to enhance functionality.
- The consolidation of the two intranet sites which increased interdepartmental relations by 50%.

EDUCATION

Minnesota State Community and Technical College | Moorhead, MN

Associate of Applied Science in Web Development | 2015

Extended Technical Focus in Computer Programming: Python, Microcomputer Databases, Database Design, and Linux
